Re: Lonza Singapore Project

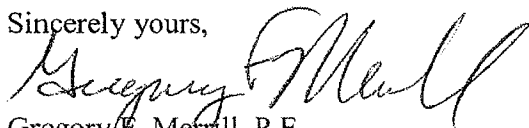

Dear John,

I want to take this opportunity to recognize and congratulate ESC on its outstanding performance on the recent Lonza Singapore Project. Designing and building 13 CIP Systems on a tight time frame is no easy task and your team not only met, but really exceeded expectations.

- Quality was excellent.
- Documentation was complete and on-time.
- FAT was on-time and well supported.
- Delivery was exactly on schedule, and the only order on the project that hit the last unit FAT date as stated in the initial award. As a matter of fact, your P.O. was the ninth group of major equipment items issued for purchase but your equipment was the first on-site.
- Packaging was outstanding and obviously well planned as there was absolutely no damage. This is especially commendable in that it involved overseas shipping and a very long ocean journey. We intend to use your standard as the benchmark on future projects.
- Cooperation of the entire ESC team through the project was great.

In this 300 million dollar project ESC exceeded our expectation on all levels, a significant achievement. It truly was a pleasure working with ESC. I highly recommend your firm based on your performance, please feel free to use me as a reference.

Sincerely yours,

Gregory F. Merrill, P.E.
