Subject: ESC Sprayballs

Hi John,

We've been purchasing a few SB's from you, and the team here is pretty impressed! Both our Prod Mgr and our QA Director have made comments about how they perform first time around.

We're going to be sourcing more from ESC as time goes on. Given how good you guys are, it makes sense for us to not make them in house, using one of our best craftsman while he could be welding on tanks.

Just wanted you to know!

Thanks and take care.

Guy
